Re: MyFirstShades™ Children's Eyewear

We are pleased to present the results of our laboratory tests of MyFirstShades™ children's eyewear.

Chadwick Optical, Inc. tested three (3) styles of MyFirstShades™ frames for their capacity to accept prescription lenses: ABC Shades™; ReallyCoolShades™; JustForGirls™ Shades.

The results of our tests indicate that all three styles appear effective for the fitting of prescription lenses. We tested high minus and high plus powers and both extremes held securely. Based on our 20+ years of experience we would feel uncomfortable making a blanket statement that any manufacturer's frames would hold all powers, as some frame and lens configurations are not compatible. The only variable affecting our testing was the frame color; specifically, black and white, which only accounts for two of the six available colors offered in the ReallyCoolShades™ style. The ABC Shades™ and JustForGirls™ Shades come in six and four colors respectively, and exclude black and white.

We are encouraged that SLP is addressing the needs of this underserved population and wish you every success.

Sincerely,

Karen Keeney
Owner

About Chadwick Optical, Inc.

Chadwick Optical, Inc. has been an optical laboratory for over 20 years and specializes in custom Low Vision Rx's. Chadwick Optical, Inc. has a worldwide reputation. Located in southern Vermont, customers range from local to as far as Saipan, South Africa, and the Philippines.

About MyFirstShades™

MyFirstShades™ brand of children's eyewear are offered as standard sunglasses with 100% protection against harmful UVA and UVB sunlight for children ages newborn to six (6) years. MyFirstShades™ is also an excellent alternative for children with prescription needs due to their unique design and fit that includes a wrap-style frame and around-the-head neoprene™ band that keeps the glasses in place.
